

## Real-Time Soccer Analysis Simplified

### RCS LaunchPad

LaunchPad is an interactive touchscreen solution that simplifies advanced soccer analysis for live broadcast all season long. At the swipe of a finger, it lets users engage fans with dynamic graphics, analysis, and telestrations that bring soccer stats and footage to life on screen - from results to standings, analytics and beyond.

Available in any language, LaunchPad gives users access to an unprecedented collection of domestic and international soccer competition data from Opta. The system is powered by RCS's production-proven software and cloud-based aggregator platform DataCenter.

LaunchPad is highly customizable and offered in a variety of configurations. It arrives at your studio with design elements tailored to meet your unique aesthetic and can easily be transported as production demands.

### System Features

- All Major Domestic and International Soccer Competitions
- Detailed Match Statistics and Player Metrics
- Predictive Analytics Section
- Twitter Curation Tool
- Web-Based Portal for Creating Bespoke Graphics
- Navigator iPad App for Remote Access and Control
- 3D Telestration and Player Tracking with Viz Libero
- Integration with Red Bee Piero, EVS, and Abekas Mira
- Client-Specific Design
- Available in any Language

LaunchPad is available via monthly subscription, which includes access to software updates and support. Contact [info@realitychecksystems.com](mailto:info@realitychecksystems.com) for more information.
