

Real-Time Soccer Analysis Simplified

RCS LaunchPad

LaunchPad is an interactive touchscreen solution that simplifies advanced soccer analysis for live broadcast all season long. At the swipe of a finger, it lets users engage fans with dynamic graphics, analysis, and telestrations that bring soccer stats and footage to life on screen - from results to standings, analytics and beyond.

Available in any language, LaunchPad gives users access to an unprecedented collection of domestic and international soccer competition data from Opta. The system is powered by RCS's production-proven software and cloud-based aggregator platform DataCenter.

LaunchPad is highly customizable and offered in a variety of configurations. It arrives at your studio with design elements tailored to meet your unique aesthetic and can easily be transported as production demands.

System Features

- An intuitive, customizable User Interface
- RCS DataCenter for real-time cloud access to match data provided by Opta
- Real-time predictive visual analytics
- Twitter integration
- Web-based portal for creating and controlling custom graphics
- Navigator iPad app for instant remote access and control of LaunchPad
- Support for EVS, Abekas Mira, Viz Libero, and Red Bee Piero

LaunchPad is available via monthly subscription, which includes access to software updates and support. Contact info@realitychecksystems.com for more information.
